Description

Update Cypress dependency to v16.1.0.Highlights from Cypress 16.1.0 / 16.x release:Performance improvements: Fixed memory leak in Cypress server with service workers in Chromium/Edge/Electron (#34721).

New feature: trustedCertificates config option for caching static assets on native browser network path (#34760).

Bugfixes for Chromium/Edge runs, service worker handling, and CLI.

Note on Cypress 16 major changes (HTTP/2 support by default, modern visibility strategy, query retry for cookies/storage, etc.).
